EDUCATION

Vellore Institute Of Technology

Bachelors Of Technology, Electronics and Communication

Vellore, TN

Aug. 2024 – 2028

Bal Bharati School

Higher Secondary Education

Bhopal, MP

May. 2021 – May 2022

EXPERIENCE

Founder & Lead Developer

June 2026 – Present

MMEW3 – Make me world wide web (www.mmew3.xyz)

Remote

- Founded and managed a self-owned web application studio with a team of 6, helping businesses scale and grow their online presence.
- Engineered responsive, high-performance web applications using modern technologies to optimize speed and SEO.
- Led client consultations, architectural design, and deployment of custom digital solutions to drive client success.

Senior Design Head

April. 2025 – Present

Computer Society Of India - club

VIT, Vellore

- Leading a team of 10+ members to design posters, brochures, and other promotional materials for events.
- Organized interactive workshops on Figma and Canva for students to enhance their design skills.
- Collaborated with other clubs to create cohesive branding and managed social media accounts to promote activities.

UI/UX Intern

March 2025 – May 2025

Jurident

VIT Incubated, TN

- Developed a user interface for a healthcare app using Figma to manage health records.
- Developed a full-stack web application using Flask, React, PostgreSQL, and Docker to analyze GitHub data.
- Explored ways to visualize GitHub collaboration in a classroom setting.

PROJECTS

World of Human Cell | Web Development | worldofhumancells.vercel.app

- Developed an interactive web application to visualize and explore human cell structures and functions
- Implemented engaging user interface with interactive 3D models and educational content
- Deployed on Vercel for fast, scalable hosting and optimal user experience

Travelian | Web Development | [GitHub](#)

- Developed a comprehensive travel planning and management web application
- Implemented features for itinerary planning, destination exploration, and travel recommendations
- Utilized modern web technologies for responsive design and seamless user experience

BiomechAI | React, TypeScript, ESP32, AI, Convex | [GitHub](#)

- Developed an advanced biomechanics analysis platform combining ESP32 sensor data with AI-powered posture and gait analysis
- Integrated real-time webcam-based pose detection using MediaPipe and ESP32 IMU sensor data collection
- Built comprehensive dashboard with real-time data visualization and professional assessment reports

CERTIFICATIONS

Generative AI Tool | Udemy | [Credential](#)

2026

- Learned prompt engineering, fine-tuning, and deployment of large language models for real-world applications.

AI in Biomedical | IBM

2026

- Explored applications of machine learning algorithms in medical imaging, diagnostics, and patient data analysis.
